Job Description – Senior Python Full Stack Developer

Position: Senior Python Full Stack Developer
Experience: 5+ Years
Job Type: Full-Time / Long-Term Contract
Work Mode: Remote
Location: Remote

About the Role

We are looking for a highly experienced **Senior Python Full Stack Developer** for long-term remote collaboration.

The ideal candidate should be a **true senior engineer** who can independently take ownership of projects, design scalable applications, make strong technical decisions, and deliver high-quality solutions.

You will work on client projects involving modern web applications, backend architecture, API development, frontend development, cloud infrastructure, and technical problem-solving.

Key Responsibilities

- Design, develop, and maintain scalable full-stack web applications.
- Build robust backend services using **Python**.
- Develop and maintain RESTful APIs and backend architecture.
- Build modern, responsive frontend applications.
- Work with frameworks such as **Django, FastAPI, or Flask**.
- Develop frontend solutions using **React, Next.js, Vue.js, and TypeScript**.
- Design and optimize database structures using **PostgreSQL**.
- Integrate frontend applications with backend APIs and third-party services.
- Containerize and deploy applications using **Docker**.
- Deploy and manage applications on cloud platforms, preferably **AWS**.
- Design scalable, secure, and maintainable system architectures.
- Review code and ensure development best practices and coding standards.
- Troubleshoot complex technical and performance issues.
- Provide technical guidance and support to other developers when required.
- Collaborate with product, design, QA, and client teams.
- Take complete ownership of assigned modules and projects from development through deployment.

Required Skills

Backend

- 5+ years of professional software development experience.
- Strong hands-on experience with **Python**.
- Strong experience with one or more of:
- Django
- FastAPI
- Flask
- Strong knowledge of REST API development and integration.
- Experience designing scalable backend architectures.
- Strong understanding of authentication, authorization, and application security.

Frontend

Strong experience with modern frontend technologies such as:

- React.js
- Next.js
- Vue.js
- TypeScript
- JavaScript
- HTML5
- CSS3

Experience building responsive, reusable, and maintainable frontend components is required.

Database

- Strong experience with **PostgreSQL**.
- Database design and schema optimization.
- Query optimization and performance tuning.
- Understanding of relational database concepts.

DevOps & Cloud

Hands-on experience with:

- Docker
- Git
- CI/CD
- Linux environments
- Cloud deployment

Experience with **AWS** is strongly preferred.

Knowledge of services such as the following will be an advantage:

- EC2
- S3
- RDS
- Lambda
- ECS / EKS
- CloudWatch

Technical Expectations

The candidate should be capable of:

- Designing applications from scratch.
- Making independent architecture decisions.
- Writing clean, reusable, maintainable code.
- Building secure and scalable APIs.
- Identifying performance bottlenecks.
- Debugging complex production issues.
- Reviewing and improving existing codebases.
- Understanding both frontend and backend architecture.
- Managing application deployment and production environments.

Soft Skills

- Strong analytical and problem-solving abilities.
- Excellent communication skills.
- Ability to work independently in a remote environment.
- Strong ownership and accountability.
- Ability to understand business requirements and convert them into technical solutions.
- Good collaboration and team communication skills.
- Ability to manage priorities and meet project deadlines.

Preferred Qualifications

Experience with any of the following will be an added advantage:

- Microservices architecture
- Redis
- Celery
- WebSockets
- GraphQL
- Kubernetes
- MongoDB
- Kafka / RabbitMQ
- Automated testing
- CI/CD pipelines

- AWS cloud architecture
- AI / LLM integrations
- SaaS application development

What We Are Looking For

We are specifically looking for a **Senior Engineer**, not someone who requires continuous technical supervision.

The ideal candidate should be able to:

- Take ownership of projects.
- Understand requirements quickly.
- Propose the right technical architecture.
- Independently solve complex development challenges.
- Maintain high coding and engineering standards.
- Communicate progress and technical challenges clearly.
- Deliver reliable, scalable, and production-ready solutions.

This is a **long-term remote opportunity** for a developer interested in working on challenging client projects and modern technology stacks.
